Dear Jay -

Thank you for Technical Report # 8 and your additional comments in the covering letter.

Even though your final results are equivocal, they have been very worthwhile in the evaluation of the [redacted] effort locally.

25X1A

The [redacted] program has been completely realigned with the view of getting a useable piece of hardware out of it. I expect to have more information on this point when you visit us within the next couple of weeks.

25X1A

Sincerely,

25X1A
